CROSS STITCH TIPS ✦

FIRST TIME STITCHING?

If you'd like a step by step on how to start stitching, check out my beginner's guide:
http://sirithre.com/cross-stitch-beginners-guide/

START FROM THE CENTER

To make sure your design is properly centered on your fabric, it's recommended to start from the center. To find the center of your fabric, fold it in half vertically, then horizontally. Where the folds meet is the center point. The pattern also has arrows pointing to the center to make it easier to figure out where to begin.

Split your thread

Embroidery thread is made up of 6 strands. It is recommended to only use 2 of those strands while cross stitching, and only 1 strand for backstitching.

Start by cutting a length of thread of the color you will be working with first. The ends of the string will start to fray and you should be able to grasp 2 of the 6 strands and pull them away from the rest. Use those two strands to thread your needle.

Be Consistent

While not required, it is generally neater looking if you start all your Xs the same way. In other words, always stitch / first then cross it. Or always start with a \ and cross it the other way, whichever feels more comfortable to you.

Don't Be Afraid To Customize

If you don't have all the colors called for in the pattern or simply feel the design would look better or fit your decor more with a different color palette, that's okay! Feel free to swap out colors as needed. I'd love to see how creative you can get with my design!
